Digital Roads Incorporated, a woman owned small disadvantaged business is the industry leader in the Rocky Mountains for meeting the challenge of very technical Audio Visual systems; providing installation and support that our friends and clients depend on. Now we would like to make our clients and prospective customers aware of our **Security Service offerings**. For over a decade, Digital Roads has stepped to the plate when our customers needed an engineered security system and in progress with that demand, our security design department has grown into a full time solution provider.

Following are some of the on site, hosted and edge technology services this department can provide:

Access Control Systems

- ❖ Local Software Based Systems
- ❖ Managed Access with Remote Administration
- ❖ Secured Area using Credential or Biometric Control
- ❖ Pedestrian Systems managing Vendor Visits and Employee Traffic
- ❖ Multi-tenant Telephone Entry Systems
- ❖ Automation for Door and Gate Locking Hardware

Video Surveillance & Camera Deployment

- ❖ Activity Analytics for Asset Protection
- ❖ Forensic Recording and Triggered Response Live Video
- ❖ Remote Viewing Software and Phone Apps
- ❖ IP Network Video and Mega Pixel Cameras

Intrusion Systems

- ❖ Alarm Installation and Monitoring Services
- ❖ Break-in and Vandal Detection
- ❖ Duress Systems with Emergency Notification
- ❖ Open & Closing Time Administration
